DECANT

Kielce, 24 October 2025

Testimonials

For several months we have been using the development services provided by Software House Sopchy, which is responsible for the development and maintenance of our online store. From the very first days of the cooperation we could rely on full support, strong commitment and immediate assistance in situations that required a rapid response.

The Sopchy team stands out for its professionalism, broad technical expertise and individual approach to the client. At every stage of the cooperation they focus on effectiveness, efficient task delivery and proposing concrete, innovative solutions that genuinely improve the store's performance and help it stand out from the competition.

What I particularly value in Sopchy is their reliability and excellent communication. Thanks to this, any doubts are resolved quickly and our needs and expectations are always understood and addressed with great care.

We recommend working with Sopchy to anyone who values the highest quality of services and a professional approach.
