**LUXTRADE**

Testimonials

It is with great pleasure that I recommend Sopchy as a reliable partner in the design, enhancement, and maintenance of websites. For the past two years, we have had the pleasure of working with the Sopchy team, who have demonstrated not only exceptional expertise but also outstanding professionalism and commitment to the execution of our projects.

Sopchy showed a strong ability to understand our needs and the specifics of our industry, which resulted in the creation of a functional and aesthetically pleasing website for us. Their approach to work is based on a solid understanding of the end user, which allowed us to achieve our business goals.

Not only was the quality of their work excellent, but their flexibility and readiness to respond quickly to our needs made working with Sopchy extremely satisfying. We faced many challenges together, and we could always rely on their support and professional advice.

It's worth noting that Sopchy has often helped us make decisions regarding various implementations, whether functionalities or modules (PrestaShop) – they pointed out where a concept might encounter problems, which is not always an obvious service with a software house, but is a highly valuable factor when making important decisions for the store's operation.

All our expectations were met and sometimes even exceeded. Therefore, we can confidently recommend Sopchy as a reliable and competent partner for the design, improvement, and maintenance of websites.
